The NETGEAR® Insight management solution is an industry first. It offers plug-and-play set up and management of your small business network, using an easy-to-use mobile app or a cloud web portal. The Insight platform allows any business owner or IT professional to discover and setup their NETGEAR devices, and monitor or manage their network, easily. The intuitive mobile app and web interface cover a variety of configuration options and network situation.

NETGEAR Insight brings 3 major benefits:

1. Insight delivers unified remote management covering select NETGEAR access points, switches, storage, and VPN routers for a complete network solution for small businesses.

2. NETGEAR Insight business owners or resellers are able to remotely manage small business networks across multiple locations -- all from a single pane-of-glass on any device.

3. Insight provides ongoing visibility control and is custom built for the specific needs of small business networks with alerts and built-in help and support.

**NETGEAR Insight subscription plans**

NETGEAR Insight management solution comes with 2 subscription plans: Insight Basic and Insight Premium. In both plans, the number of devices and locations that can be managed are unlimited (with a subscription).

**Insight Basic** includes Insight mobile app management, and is free for the first two Insight devices on your network. Starting with the 3rd device, there is a per device, per year subscription fee of only $4.99. The NETGEAR Insight app is free to download from the Apple® App Store® and Google Play™

**Insight Premium** includes management and monitoring through both the Insight mobile app and the Insight Cloud Portal, together with additional Insight advanced features. Insight Premium comes in two flavors, a monthly per-device subscription of $0.99 or a yearly per-device subscription of $9.99. Insight Premium subscription fees apply to all Insight devices on the network (starting with the first device).

**Insight Pro**, designed for MSPs and resellers, includes all Basic and Premium Feature and more, like multi-tenancy & multi-roles. Only purchasable through distribution. Contact us for Pricing.
The Insight Premium advantage

The Insight Cloud Portal
Just as in the Insight mobile app, you can perform setup, monitoring and management through a new intuitive web portal – backed by the Insight Cloud. Through the portal, users have a single-pane-of-glass view of all their devices and their locations (multiple sites), from any device, PC, MAC, or tablet, on a larger screen, which is ideal for configuring larger port-count switches, such as the 28-port and 52-port Insight Managed Smart Cloud switches. The Insight Cloud Portal is included with the Insight Premium subscription plan only.

Insight Core Features
- Insight mobile app
- Local device GUI
- Device Discovery with network scan
- Device Scan by QR or Bar Code via Insight mobile app
- One-Tap Device Registration
- Single Sign On (SSO)
- Email Alerts
- Push Notifications
- Firmware scheduler
- Support for Multiple Locations
- Cross Device Support (Access Points, Switches and NAS)
- One-tap/click Add Device to Network
- Advanced PoE configuration
- Two-factor authentication
- In-app access to NETGEAR support
- Data History: Up to 7 days with Premium (24 hour with Basic)
- Instant VPN & ProSUPPORT Purchase*
- SNMP Device Status - Ready only & log export*
- Network-Level Config Copy & Cloning:
  - Allows admins to create, save, copy, and move device configs and network settings, already applied to other networks (copy & clone configs like SSID, VLANs, LAGs, wired/wireless settings and more).
  - Once a configuration is saved under the new location continue to modify for specific customization.
  - Significantly reduce time set up for multiple networks and enable speedy deployment for any new network location.
- Insight Cloud Portal (browser-based*):
  - Account-Level View
  - Locations-Level View
  - Device-Level View
- Customizable Dashboard*:

Insight advanced features
The Insight Premium subscription also comes with three advanced features for optimal configuration of your business network.

Fast Roaming:
Enhance the WiFi experience for your employees and guests by allowing their WiFi connections to seamlessly move from one Insight access point to another, without loss of their session connectivity.

Network-Level Config Copy & Cloning:
- Allows admins to create, save, copy, and move device configs and network settings, already applied to other networks (copy & clone configs like SSID, VLANs, LAGs, wired/wireless settings and more).
- Once a configuration is saved under the new location continue to modify for specific customization.
- Significantly reduce time set up for multiple networks and enable speedy deployment for any new network location.

Facebook WiFi:
Facebook WiFi allows the business customers to leverage their Facebook credentials to check into the business guest WiFi. They can also interact with the Business Facebook page to get access to free WiFi on their premises.

PoE scheduler:
- Easily setup multiple schedules/timers for your Power-over-Ethernet devices connected to your PoE Insight Switches right through the Insight mobile app or Cloud Portal.
- Schedule PoE enabling/disabling by port to ensure optimal energy conservation as well as optimal security.
- Fine-tune as needed to maintain the optimal schedules by week, day and time.

* Insight Premium subscription features only
### Basic and Premium Product Features

#### Access Point Management Features: Setup SSIDs, security and guest Captive Portals. Manage WiFi Channels and seamless Fast Roaming.

- Devices Supported: WAC505, WAC510, WAC540, Orbi Pro Router and Satellites
- SSID Setup (Up to 8 SSIDs)
- Frequency band Selection
- VLAN Creation and Association with SSID
- WiFi Security: - WPA/WPA2 - PSK & Enterprise
  - URL Filtering
  - MAC ACL
- Custom Captive Portal Creation
- Visibility into WiFi Clients
- WiFi Auto Radio Management
- Instant WiFi with Auto RRM (Available with WAC540)

#### Switch Management Features: Configure ports, traffic priority, security and PoE; setup VLANs including across switches.

- Devices Supported: GC110, GC110P, GC510P, GC510PP, GC728X, GC728XP, GC752X, GC752XP
- Advanced L2 switch features setup and management
- Create isolated segments for Point-of-Sale, Guest Internet, VoIP, Video
- Internal IP setup for LAN
- Group Port Wizard for easy ports configuration even across multiple devices
- VLAN creation, setup and management
- Traffic prioritization including Video and VoIP
- Port trunking (LACP/LAG) management
- Traffic tagging/untagging
- Advanced per-port PoE management
- Enable/disable PoE and traffic per port
- IP Filtering
- Duplex Mode: Auto, Half, Full
- Jumbo frame support/frame size selector
- Per port speed selection
- Switch Diagnostics
- STP/RSTP Enable/Disable
- Static Routing

#### Storage/NAS Management Features: Stay on top of status, update settings and firmware of your ReadyNAS storage devices.

- Devices Supported: All ReadyNAS except 100-series
- Status Check
- NAS discovery, monitor, reboot
- NAS Setting: IP Address
- NAS Monitoring:
  - System & CPU Temperature
  - Fan Speed
- NAS Usage Stats:
  - By Volume and By (User) Shares
  - RAID Level
  - Disk Status
Access and protect your data from anywhere.

Remote VPN and Site-2-Site VPN features are ONLY available with a VPN Subscription. Insight Basic/Premium users are able to purchase VPN Subscription service via the app or from the Insight portal. For Insight Pro use, VPN Subscription is available for purchased from an authorized distributor.

**Remote VPN** is for individuals that need to securely login to their small business network, remotely and access the network resources.

**Site-2-Site VPN** is for businesses with multiple offices that need to connect virtually all locations and all users to access all 3 networks’ resources.
